

# **STATEMENT OF PURPOSE**

## **INTRODUCTION**

I am Sreekutty PC. I am currently residing in Kottayam, located in South India. I am a girl passionate about technology and want to explore it as much as I can. I am a team player with the willingness to learn and broaden my skill set. I completed my 10th grade in 2010, and subsequently, I completed my 12th grade in 2012 in the science stream. After successful completion of my schooling, I decided to pursue B.Tech in Electronics and communication from GISAT Engineering College, affiliated with MG University 2012-2016. Then, I pursued PGDB at Manipal University from 2018-2019. I am working as a relationship manager at ICICI Bank since April 2019 till now. During my work experience, I got to know about various cyber crimes happening in every field. This generated my curiosity to know more about them and hence, upon intensive research, I converted my curiosity into my passion to eliminate this from our society.

## **WHY CHOOSE THIS COURSE**

With the internet ruling the lives of people, cybercrime has become a major threat to people that they can't avoid. I have seen and read many cases of cybercrime and I feel helpless as I can't do something without knowledge and training. It is affecting everyone from citizens and their governments to small businesses and the world's biggest companies. The threat is so pervasive that millions of skilled cyber security professionals are needed to safeguard identities, data, online networks and financial assets from highly skilled hackers. Also, this has created incredible cyber security career opportunities for specialists with the right combination of education and experience. It has also prompted the academic world to introduce a range of new on-campus and online cyber security degree programs. So, I am intrigued by the concept of cybersecurity, thus I wish to pursue M.Sc in cybersecurity. In recent years, the cyber world has become rapidly integrated and anyone with high goals in the cyber world should possess an international perspective along with being aware of the realities of

different international arenas as well. I wish to acquire higher studies to further broaden my experience in the cyber industry. Through this course, I fancy learning all the skills including detection, prevention, data synthesis, handling complex mechanism, troubleshooting, etc. This course will help me capture the emerging opportunities in the field of cybersecurity as more and more companies demand highly skilled cybersecurity professionals to save their data and confidential information.

## **WHY CHOOSE THE UNITED KINGDOM**

Given the kind, relaxed atmosphere of the United Kingdom and the outstanding educational system, it is always a priority for me to study here. It also boasts great living standards and gives a lot of opportunities to explore. The United Kingdom is quite lively. It is an inherently friendly nation with an extreme cultural legacy. It boasts numerous higher education institutions of international standing. The UK offers foreign students a wealth of experience. I believe that UK's educational qualifications will provide the finest lifetime experience for me. It is a truth that the UK is known for standards of teaching rendered by top-class universities in the world. The universities deliver specialized programs, and their eternal objective is to give training and support so that their students may prosper. The United Kingdom provides excellent education and outstanding student support at affordable rates without conciliating the standard of teaching compared to other nations abroad such as America and Canada.

## **WHY CHOOSE THIS UNIVERSITY**

The United Kingdom is a flourishing nation with several top-notch universities but the University of Hertfordshire is a diamond itself in the field of higher education. This university, which is based in Hatfield, is the number one international provider of experience between universities and institutions in the UK. It is an innovative, contemporary university with outstanding employability and qualifications for graduates. Education quality, contentment of graduates, infinite employment opportunities, and satisfaction with skills and knowledge gained are outstanding at Hertfordshire University. The university host more than 5000 international

students providing various facilities such as on-campus accommodation, traveling services, etc. The QS World University Rankings and THE rankings have granted a rank between 801-1000 to this notable university. The university was granted gold recognition for its Teaching Excellence Framework by the British Government assessment which is fabulous.

## **CONCLUSION**

So now, I am looking forward to going to the United Kingdom for my higher studies. I had numerous internships and projects during my bachelor's degree, which gave me a lot of exposure to different types of cyber industries. I believe that your university will help me to enrich my experiences and provide industry exposure as well. After completing my M.Sc in Cyber Security from your reputed university, I wish to return to my home realm i.e. India and serve the companies to protect them from cyber threats. I want to use my knowledge and potential to save the people of my country from potential cybercrimes, and thus, complete my duty as a professional.

Regards
